# Your trusted supplier of eco-friendly paper

Mila Papier Sp. z o.o., based in Kostrzyn nad Odrą, specializes in paper and board converting, packaging, and wholesale distribution.

**As a family-owned business, we combine many years of experience with commitment and accountability at every stage of cooperation.** In our relationships with clients, we focus on trust, flexibility, and a personal approach, because we believe the best business is built on long-term partnerships and shared values. The family nature of our company is reflected in the quality of our service, attention to detail, and consistency in meeting our commitments.

From the very beginning, sustainability has been at the heart of what we do. Care for the environment has become one of the strong foundations of our business. We provide a modern alternative to non-biodegradable packaging materials, offering not only paper products but also safe and responsible packaging solutions such as paper void fillers and shredded paper.

## What sets us apart?

Advanced machinery for cutting and packaging

Over 30 years of experience

Fast and flexible order processing

6,000 m<sup>2</sup> of operational space

In-house transport fleet

Serving clients in Poland, Germany, the Czech Republic, France, and across other EU markets

## Our solutions support, among others:

- ✓ Logistics and fulfilment centres
- ✓ E-commerce and distribution companies
- ✓ Printing houses and manufacturers of paper cores and tubes
- ✓ Construction companies (masking paper and board products)
- ✓ Businesses looking for reliable and eco-friendly packaging materials

# Best-selling products and a wide range of specialist solutions

At Mila Papier, we provide products that support everyday packaging, protection, and transport needs in a wide range of industries.

### Shredded paper

A lightweight and flexible material for protecting and stabilising products. An eco-friendly solution for a wide range of packaging applications.

### Wrapping paper

Durable paper for packaging and protecting goods, ideal for securing palletised shipments and goods in transit.

### Solid board interlayers

Strong board sheets for reliable protection of goods on pallets and during transport.

### Paper reels

Durable paper reels for the production of edge protectors, cores, and packaging reinforcements. Reliable for hygiene products and industrial applications.

### Paper void fillers

Effective protection for shipments and efficient void filling in packaging. Convenient, eco-friendly, and available in a wide range of options.

### Dispenser

A practical solution for convenient dispensing of paper and other packaging materials. Improves workflow and makes packing faster and more efficient.

## Fast, flexible, professional

We combine product availability with flexibility and efficient order fulfilment.

## Paper void fillers

Paper roll filler is a practical and eco-friendly solution for protecting products during packing and shipping. It effectively fills empty spaces in boxes, keeps the contents stable, and helps improve transport safety. Its convenient roll format makes everyday packing operations more efficient and allows orders to be prepared quickly for dispatch.

The product is available in two versions – boxed and unboxed – making it easy to adapt to different packing stations.

Applications: **filling empty space in packaging, blocking, cushioning, and wrapping items.**

Grammage (g/m <sup>2</sup> )	Roll width (cm)	Roll weight (kg)	Roll length	Core diameter (mm)
70	35	11	450	76
80	35	12,6	450	76
90	35	11	350	76

## Shredded paper

Shredded paper is an attractive filling material used to protect products and fill packaging during transport. Its lightweight form allows it to adapt easily to different packaging shapes and sizes, helping to stabilise the contents and protect them from minor damage. Thanks to its decorative appearance, it is also widely used for gift wrapping and product displays.

Advantages: **biodegradable, dust free, high yield, and resilient.**

Width:	Packaging:	Colours:
4 mm	1 / 5 / 10 kg	eco kraft (brown), yellow, pink, purple, blue, black, white, green, red

## Wrapping paper in rolls (on cores)

Wrapping paper on cores is a practical and convenient solution for wrapping, protecting, and preparing products for transport and storage. The roll format ensures ease of use, smooth unwinding, and allows the amount of paper to be adjusted to current needs. The core makes handling more convenient, supports use at packing stations, and helps keep the packing process efficient and well organised.

Grammage:	Type:	Dimensions:
from 70 to 130 g	roll	from 20 cm to 150 cm

## Wrapping paper

A versatile material designed for protecting, separating, and securing products during packing and transport. It helps protect surfaces from dirt, scratches, and mechanical damage, while its durability makes it suitable for both individual packing and securing larger loads.

Grammage:	Dimensions:
from 80 to 130 g	min. 50x50 cm max. 150x150 cm

## Solid board interlayers

Solid board interlayers are a practical and durable solution used for separating, stabilising, and protecting products during transport and storage. They help prevent goods from shifting, scratching, and mechanical damage, while also making bulk packaging easier to organise. Thanks to their rigidity and versatility, they are used across a wide range of industries, supporting the safe preparation of products for shipping and storage.

Grammage:	Dimensions:
from 100 to 400 g	min. 50x50 cm max. 150x150 cm

## Protective floor board

Protective floor board is a durable solution designed to protect floors and surfaces from mechanical damage, dirt and spills during renovation or construction work. Its high grammage ensures excellent resistance to tearing and puncturing.

Grammage:	Dimensions:
from 130 to 350 g	1 m (15/25 lm)

## Paper reels

Paper reels for core production are a reliable solution for manufacturing processes that require durable and properly prepared paper material. They enable the production of cores with the required specifications, supporting efficient and consistent output. Thanks to their functionality, they are used wherever quality, strength, and precision matter in the finished product.

Grammage:	Dimensions:
from 200 to 400 g	from 6 to 30 cm

## Honeycomb paper wrap

Honeycomb paper wrap is a reliable protective material designed for wrapping and securing products during packing and transport. Its structure allows it to adapt well to the shape of the item, helping protect it from mechanical damage.

Grammage:	Width:	Roll length:
70 g	10 / 15 / 20 / 30 / 40 / 50 / 60 cm	25 / 50 / 100 / 250 lm

## Cushioning paper

Cushioning paper is a practical protective material designed to safeguard fragile products during packing, transport, and storage. Its structure helps absorb shocks, protect product surfaces, and reduce the risk of damage.

Grammage:	Dimensions:
100 / 125 / 170 / 240 g	Sheets: min. 20×20 cm, max. 120×100 cm Rolls: min. 40 cm, max. 100 cm

## Paper tape

An eco-friendly alternative for sealing boxes and parcels. It helps secure shipments efficiently, provides a neat finish, and supports more sustainable packaging.

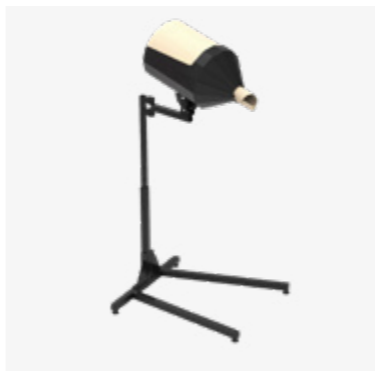

Backing material:	Adhesive layer:	Colour:
paper	natural rubber	brown
Backing thickness (paper):	Total thickness (backing + adhesive):	Service temperature range:
90 microns	125 microns	-25°C to +65°C

## Paper dispenser

Reliable support for everyday packing operations. It enables quick unwinding and convenient dispensing of paper, improving both working comfort and efficiency.

## Manual dispenser

The manual dispenser allows convenient use of wrapping paper during packing and product protection. Its robust construction and ease of use support efficient workflow and make it well suited for everyday use in warehouses and shipping areas.

Mounting type:	Adjustment:	Safety features:	Built-in cutter:
freestanding / workstation-mounted / wall-mounted	up/down, left/right, tilt	yes	yes

## Packing station

A functional solution that can be tailored to individual needs and specific workflow requirements. Optional features such as electric height adjustment, a built-in scale integrated into the worktop, or a paper dispenser help improve comfort, ergonomics, and efficiency in everyday packing operations.

## Pallet

A wooden pallet manufactured in accordance with European standards for use in transport and storage. It can be produced in standard sizes such as the Euro pallet or as a one-way pallet made to the dimensions specified by the customer.

## Pallet collar

A solution that increases the functionality of standard pallets, allowing them to be quickly converted into stable transport and storage containers. Our range includes durable and robust pallet collars in both standard and custom sizes and configurations.
